

Royal Vista Aquatics — 1StudentID Demo Script

A guided walk-through for demonstrating **1StudentID** to a swim club. The whole app is scoped to a single-purpose swim-club product for the swim accounts, so nothing "school-like" leaks into the demo.

Before you start (2 minutes)

1. The app **auto-refreshes its demo data** whenever a new version is deployed, so every screen is populated on first load. If anything ever looks empty mid-demo, click **"Reset demo"** (top-right of the header) and refresh.
2. *Optional:* on the login page, **Start guided demo** runs a self-driving tour of this whole script — it logs in as each persona, opens and submits real forms, and explains each step in a tooltip. Great as a rehearsal or a kiosk loop; the script below is the presenter-driven version.
3. Have these logins ready (password is `demo` for all):

Persona	Login	Who they are
Club Manager	<code>clubadmin@demo.com</code>	Jessica Davies — runs the whole club
Swim Coach	<code>coach@demo.com</code>	Coach Ava Johnson — Head Coach, sees only her own swimmers
Parent	<code>parent@demo.com</code>	Jack Smith — dad of Oliver (squad) & Olivia (learn-to-swim)
Co-parent	<code>coparent@demo.com</code>	Amelia Smith — Oliver & Olivia's mum, separate login
Swimmer	<code>student@demo.com</code>	Oliver Smith — competitive squad

One-line pitch: "Royal Vista Aquatics runs its whole club — registration, attendance, coaching, awards, competition, safeguarding, fees and family communication — from one app, with one login per family member. Let me show you a day in the life."

Golden rule of the demo: the coach only ever sees *her own* swimmers; the manager sees the *whole club*; each parent sees *only their own children*. Call this out — it's the real-world least-privilege story clubs care about.

Act 1 — The Club Manager (`clubadmin@demo.com`)

1. Capacity planning — the dashboard opener

- **You land on the Dashboard.** Scroll to **Capacity planning**.
- **Point out:** every session's **seat fill** (e.g. 6/12) and **coach staffing**, the overall utilisation %, and the **Under-filled / Low** flags on weak sessions.
- **Show** the consolidation suggestion under an under-filled session — "*move these 2 swimmers into [a fuller same-level session] (has N free seats)*" — and that it links straight to the session where the move happens.
- **Say:** "A ten-seat session with two swimmers loses the club money. The manager sees fill rates at a glance and consolidates groups in two clicks — that's revenue protection, not just admin."

2. Register a swimmer & assign to a class (*add-new vs add-existing*)

- **Go to:** Swimmers.
- **Point out** the two highlighted buttons top-right: **Register new swimmer** and **Enrol existing swimmer**.
- **Do (new):** Click **Register new swimmer** → name, **date of birth**, starting **level**, and **assign to a session**. Watch the **1StudentID login** panel react to the age:
 - Under 18 → **the parent/guardian holds the login** (asks for guardian name + email).
 - 18 or over → **the swimmer manages their own login** (their email).
 - Pick a **sign-in method** — Google, Apple ID, Microsoft Entra ID, or a 1StudentID email login → *Register & create login*.
- **Say:** "Registering a swimmer also onboards them onto 1StudentID. If they're a child, the login goes to the parent; if they're an adult, to the swimmer. And they sign in with what they already use — Google, Apple, Microsoft/Entra, or our own login."
- **Do (existing):** Click **Enrol existing swimmer** → the **cross-institute consent flow: Find** (search by email or 1StudentID ref — try `emily.taylor01@gmail.com` or `S-2002`) → pick a **swim session** to enrol into → **Request** → **Approve** (OTP or one-click magic link) → **Enrolled**. The swimmer appears on the roster with an "*Enrolled via consent*" badge.

- **Say:** "If a swimmer already exists on 1StudentID at another institute, we never re-key or duplicate them. Notice we can only search by email or reference, and **age, contact details and records stay hidden until the student or guardian approves** — that's GDPR-safe by design."
- **Modify a swimmer's programme:** on any swimmer row click the **sliders icon (Manage programme)** → add them to a session or remove them from one.
- **Off-board a swimmer who leaves:** on a swimmer row click the **Off-board (person-minus) icon** → pick a **reason** and **effective date**, and confirm the two switches: **stop recurring billing** and **stop automated messaging** → *Off-board swimmer*. To bring them back, click **Reactivate (rotate icon)**.
- **Say:** "When a swimmer leaves we don't delete them — that would breach our record-keeping duty. We **off-board** them: history retained, but Direct Debits and automated reminders stop immediately. If they come back, one click reactivates everything."

3. Courses & Awards — the club's own curriculum (*admin adds courses*)

- **Go to:** Courses & Awards.
- **Show** the award pathway — **Duckling 1–4** and **Learn to Swim Stage 1–2** — modelled exactly on the Swim England scheme. Click **Duckling 4:** the **8 activities** a swimmer must demonstrate (jump in unaided, mushroom float, 360° rotation, push-and-glide, submerge, 10 m travel...) and every swimmer's progress against them.
- **Do:** Click **New course** → name it (e.g. *Learn to Swim Stage 3*), pick the strand and badge colour, and type the **activities checklist** (one per line) → *Add course*.
- **Say:** "The club defines its own award courses — each one is a checklist of activities. Coaches tick them off in the session, and when the last one's done the certificate is issued automatically. We'll watch that happen in Act 2."

4. Coaches & sessions — cover an absent coach & off-board a leaver

- **Go to:** Coaches & Sessions.
- **Do (cover):** On an upcoming session click **Manage** → mark a coach **absent** (reason + optional substitute). The swap flows into the timetable and the coach-attendance report.
- **Do (temporary cover, 12h):** in the same dialog use **Temporary cover · auto-reverts in 12h** → pick a coach → **Cover 12h**. Back on the list the coach shows a **timer badge** with hours remaining and an **End now** link.
- **Say:** "Coach stuck in traffic or off sick for one evening? Drop a temporary cover in — it *automatically reverts after 12 hours*, so the timetable never drifts out of date. Permanent changes stay permanent; one-off cover cleans itself up."
- **Do (off-board a coach):** In the **Coaching team** card, click **Off-board** on a coach who's left → same GDPR-safe leaver flow (history kept, payroll and messaging stop). Off-boarded coaches can no longer be rostered or picked as cover; **Reactivate** brings them back.
- **Shortcut — manage coaches from the session itself:** open any session (e.g. Swim Club → a session). As the manager you get a **Manage coaches** button on "Coaches on deck" — change **both the coach and the swimmers in one place**.

5. Finance — mandates, co-parents & who paid what

- **Go to:** Fees & Finance.
- **Point out** the framing: the manager runs **collections** — *Collected, Outstanding, Collection rate* — not "pay now".
- **Scroll to Payment methods & mandates:** each family's preferred method (Direct Debit / Card / Cash) with mandate status. **Flag** the amber/red ones — a **Pending** mandate awaiting signature and a **Failed** direct debit.
- **Point out** on paid invoices the small "**by Jack**" / "**by Amelia**" under the Paid badge — *who* in the family settled each fee.
- **Say:** "Separated parents are normal life for a club. Both of Oliver's parents have their own logins, both see the children, and each can pay for different classes — dad covers the squad fees, mum covered the award assessment. Every payment records who made it. We'll see the parents' side in Act 3."
- **Tie-back:** if you off-boarded a swimmer in step 2, point to their mandate now reading **Stopped · off-boarded** — proof billing genuinely halts.
- **Do:** On a due invoice click **Record payment** → choose *Direct Debit / Card / Cash* → record.

6. Marketing & CRM — contacting potential swimmers

- **Go to:** Marketing & CRM.
- **Say:** "These leads came from our Facebook and Instagram campaigns and walk-ins."
- **Do:** On a lead click **Contact** → log a **Call / WhatsApp / Email** with a note, and tick *mark as contacted* → the lead advances **New** → **Contacted**.
- **Add a lead:** click **New Lead** — capture **phone and/or email** (required), with a swim-specific **Programme of interest** picklist and the aquatics team as **Owner**.
- **Point out** the **Contact** column — click-to-call / click-to-email.

7. Coach education & CPD — assign development to a coach

- **Go to:** Coach Training.

- **Do:** Click **Assign CPD** → pick a coach + an aquatics course (e.g. *Safeguarding in Aquatics*) + due date → assign.
- **Say:** "The manager recommends CPD to each coach and tracks completion. We'll see the coach's side shortly."

8. Coach appraisals — family stars *and* the club's own grade

- **Go to:** Coach Appraisals → open **Coach Ava Johnson**.
- **Show** the blended score (family ratings × squad performance) and the reviews.
- **Point out** any review marked **Anonymous** — the coach sees "Anonymous parent", but **as the manager you still see exactly who wrote it** (accountability without exposure).
- **Club grade (management appraisal):** scroll to **Club grade**. Ava holds **Gold** with a private management note.
 - **Do:** set a level — **Bronze / Silver / Gold / Platinum** — with a comment → *Save grade*.
 - **Show** the visibility toggle: **Private (admin & coach only)** by default; one click makes the medal visible to parents and other coaches.
- **Say:** "Parents rate what they see; the club grades what it knows — how well a coach actually develops swimmers. A coach can be parent-popular but under-training the kids, and this is where we track that. It's private between management and the coach unless the club chooses to publish it."

9. Summary reports — daily to yearly, plus month-end HR

- **Go to:** Summary Reports.
- **Do:** Toggle **Daily / Weekly / Monthly / Yearly**. The **Monthly** view is a **true calendar month** (1st→31st); < > steps whole months.
- **Walk through:** sessions conducted, swimmer attendance, coach attendance & cover, swimmers rated, record-book activity, **incidents**, and **wellbeing check-ins**.
- **Monthly evaluation (HR view):** on **Monthly**, the manager gets an extra block — a **Coach summary (HR)** table (sessions led, absences, cover carried, **reliability %**, notes, ratings, incidents, wellbeing) and a **Swimmer attendance** table (worst-first, sub-75 % flagged red).
- **Do:** Click **Print / export** for a board-ready report.

Act 2 — The Swim Coach (coach@demo.com)

Log out and back in as the coach. **Note:** her menu and data are the club, and only *her* sessions and swimmers — nothing else.

10. Attendance record

- **Go to:** Swim Club → open today's session (or Dashboard → today's pool).
- **Do:** Mark swimmers **Present / Late / Absent** and **Save**.
- **Say:** "Register taken poolside on a phone or tablet in seconds."

11. Courses & awards — tick activities, earn the certificate ★

- **In the session**, scroll to **Courses & awards** — every swimmer on the register with the award they're working on.
- **Do:** On a swimmer with a course in progress (e.g. **Olivia — Duckling 4, 5/8**), click **Activities** and **tick the remaining items** as she demonstrates them. On the final tick:
 - the award **auto-certifies** ("Olivia earned Duckling 4! Parents notified"),
 - her **parents get a message** announcing the achievement,
 - a **Certificate** link appears — open it: a print-ready, Swim England-style certificate ("Well done! ... You're now ready for Learn to Swim Stage 1"), with the completed criteria on the back. Click **Print / Save PDF**.
- **Do:** For a swimmer with no course, pick one from **Start a course...**
- **Say:** "This is the swimmer journey in one flow: the coach ticks off skills poolside, the certificate issues itself, and mum and dad hear about it before pick-up. No paper cards, no lost badges."

12. Temporary class move (swimmers, auto-reverts after 12h)

- **In the session**, click **Move swimmer** → pick a swimmer → choose another session → **Temporary (today)** → move. The destination shows a **"Temp · Xh left"** badge and a **Move back** button.
- **Say:** "Lane too crowded, or trialling a faster group? Move a swimmer for the day — it auto-reverts after 12 hours. Same idea as the manager's temporary coach cover: one-off changes clean themselves up."

13. Safety & wellbeing

- **In the session**, under *Record book, safety & wellbeing*:
 - **Do: Log incident** (e.g. a minor slip) — Type, Severity, action taken.
 - **Do: Wellbeing check** — pick a swimmer, set **Green / Amber / Red**.

- **Say:** "Safeguarding is first-class. Incidents and wellbeing flags roll straight into the club report."

14. Learning plan & progress + qualify for the next level

- **Go to:** Record Books → open a swimmer (e.g. **Olivia**).
- **Show** the **Level & progression** card and the **Awards & certificates** panel (the Duckling 4 certificate you just issued is already there).
- **Do:** Click **Record assessment** → tick criteria met → save; a fully-met swimmer is **Qualified** and can be **Promoted** into a next-level session.
- **Also show:** the **record-book timeline** — the two-way log shared with the family.

15. Competitive club management — race times & PBs

- **Go to:** Competitive Squad.
- **Do:** Click **Log a time** → swimmer + event + time (e.g. 30.20) → log. If it beats their best, a 🏆 **New PB** flags instantly.
- **Say:** "Oliver has taken 1.6 seconds off his 50 free this term."

16. Coach education & my appraisal

- **Go to:** Coach Education — **Recommended for you** shows the CPD the manager assigned in Act 1.
- **Go to:** My Appraisal — the coach sees her blended score, her reviews (anonymous ones show as **"Anonymous parent"** — she can't see who), and her **Club grade (Gold)** with management's note. "Private feedback loop between the club and the coach."

17. Messaging with parents

- **Go to:** Messages.
- **Do:** Open the thread with **Jack Smith** (Oliver's dad) and send a message — notice the earlier **automatic certificate notification** in a parent thread.
- **Say:** "Two-way, logged messaging — no personal phone numbers, no lost WhatsApp threads."

18. My profile (*works for every account*)

- **Go to:** My Profile → **Edit profile** — upload a photo, change name/phone/ tagline. **Email is locked** (it's the account key).
- **Say:** "Everyone maintains their own profile — coaches, parents, swimmers. The login email never changes, so identity stays stable."

Act 3 — The Parents (parent@demo.com , then coparent@demo.com)

Log in as **Jack** (dad). **Emphasise:** one login for the whole family, and each parent sees **only their own children**.

- **Dashboard:** Oliver and Olivia — and the **Swim awards & certificates** card: Olivia's freshly-earned **Duckling 4** (open → print the certificate) and Oliver's award progress.
- **Record Book (Olivia):** the coach's notes, the **Level & progression** card, and **Awards & certificates**.
- **Record Book (Oliver):** competitive squad — his **personal bests**.
- **Messages:** the coach's reply *and* the automatic **certificate notification** — "🏆 Great news! Olivia has completed Duckling 4...".
- **Fees:** the family's invoices; dad pays the squad fee — the invoice records **"by Jack"**.
- **Teacher Appraisals** → **Coach Ava:** leave a **star rating and comment** — and tick **"Submit anonymously"**.
 - **Say:** "Honest feedback without awkwardness at the poolside. The coach sees the stars but not the name; the club manager still can, so it can't be abused."

Now log in as **Amelia** (coparent@demo.com) — the co-parent.

- **Point out** the banner on Fees: *"Shared with Jack — you both look after Oliver & Olivia. Each of you can pay for different classes independently."*
- **Show:** the **same two children**, the same record books and certificates — and a **Due** invoice for a *different class* (e.g. Oliver's Triathlon squad). **Pay it** — it records **"by Amelia"**.
- **Say:** "Separated parents both stay fully involved: both see everything about their child, and each pays for what they've agreed to — separate logins, separate payments, one child record. This is a real scenario clubs handle every week, and most systems can't."

Act 4 — Wrap-up talking points

IT reliance & management overhead

- **Fully hosted SaaS** — no servers, no installs, works on any phone, tablet or laptop through a browser.
- **One identity per person** across the club (and any other 1StudentID institute they belong to) — no duplicate accounts, no re-keying.
- **Self-service** registration, fees, profiles and messaging pushes day-to-day admin out of the office — coaches mark registers poolside, parents update their own details and pay their own way.
- Demo data **auto-refreshes on deploy**; CSV import/migration for onboarding from spreadsheets or a legacy system (**Migration & Imports**).

Support structure

- In-app help and guided onboarding (including the **self-running guided demo**); email/ticket support with defined response times; a named account manager.
- Role-based access (RBAC) and audit trail (**Compliance & Audit**) — important for safeguarding.

Feature requests & development time

- The platform is **modular** — modules switch on/off per club.
- **Say:** "You've just seen features built specifically for a swim club — award checklists with automatic certificates, capacity planning, 12-hour temporary moves for swimmers *and* coaches, co-parent payments, private coach grading. That's how we respond to what a club actually needs."

Quick reference — feature → where to find it

Demo point	Persona	Screen
Capacity planning (seat fill, consolidation)	Manager	Dashboard → Capacity planning
Register (new / existing) + assign	Manager	Swimmers
Modify a swimmer's programme	Manager	Swimmers → Manage programme (sliders icon)
Add an award-course (activity checklist)	Manager	Courses & Awards → New course
Tick activities → auto-certificate + parent notify	Coach	Session → Courses & awards
Print a certificate	Coach/Parent/Swimmer	Certificate link (session, record book, dashboard)
Temporary class move (12h revert)	Coach	Session → Move swimmer
Temporary coach cover (12h revert)	Manager	Coaches & Sessions → Manage → Cover 12h
Attendance	Coach	Session
Learning plan & progress	Coach/Parent	Record Book · Learning (LMS)
Qualify for next level	Coach	Record Book → Level & progression
Payment method (DD/Card/Cash)	Manager	Fees & Finance
Co-parent access & separate payments ("by Jack/Amelia")	Parents	Fees (both parent logins)
Coach training	Coach	Coach Education
Assign/recommend CPD	Manager	Coach Training → Assign CPD
Ratings & parent feedback (incl. anonymous)	Parent	Teacher Appraisals → Coach Ava
Club grade (Bronze/Silver/Gold/Platinum + visibility toggle)	Manager	Coach Appraisals → coach → Club grade
Competitive times / PBs	Coach	Competitive Squad
Safety & wellbeing	Coach	Session → Log incident / Wellbeing check

Demo point	Persona	Screen
Reports (any period)	Manager	Summary Reports
Monthly evaluation (HR: staff + swimmer roll-up)	Manager	Summary Reports → Monthly
Messaging (incl. auto certificate notifications)	Coach ↔ Parents	Messages
Add lead (with phone/email) + outreach	Manager	Marketing & CRM → New Lead / Contact
Coach cover / substitution	Manager	Coaches & Sessions
Manage coach + swimmers on one screen	Manager	Session → Manage coaches
Off-board a swimmer / coach (GDPR leaver)	Manager	Swimmers / Coaching team → Off-board
Reactivate an off-boarded person	Manager	Swimmers / Coaching team → Reactivate
Edit own profile (photo, details; email locked)	Everyone	My Profile → Edit profile
Self-running guided demo	—	Login page → Start guided demo

*Tip: demo data refreshes itself after each deploy. If anything looks empty mid-demo, click **Reset demo** and refresh.*
